

Miller and Urey Experiment

Use the following incomplete image to set up your own Miller and Urey Experiment. You may research this experiment using the computers or your phone. (If you are caught looking at anything other than this experiment you will get a zero) Be sure to **list and label** all the inorganic materials used (gasses etc.) and write them into the diagram. Write a **detailed list of materials, a procedure, and notes on observations you think you might have witnessed below.**

Materials:

Procedure:

Notes:

Imagine that YOU were the first scientist to test the primordial soup theory! Write a short summary of what you did in this experiment, why you decided to test it, and what significance your findings may have on the scientific community.
